DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 2-6 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 2-6 appear to be directed to an abstract idea rather than a practical application of the idea.

The claimed invention does not result in a physical transformation nor does the claimed invention appear to provide a useful, concrete, and tangible result. Specifically, the claimed invention does not appear to produce a tangible result because merely “generation of a three dimensional fractal subsurface”, “selecting Voronoi centers”, “generating an initial model”, “assigning different discernable representations to regions”, “demarcating boundaries of regions”, “repeating the gravity response”, “adopting the process of gravity response”, and “integrating the response” are nothing more than thoughts or computations within a processor. It fails to use or make available for use the result of the method to enable its functionality and usefulness to be realized. In other words, the claim deals only with abstract ideas, and lacks a tangible result, i.e. displaying on a computer monitor.

To expedite a complete examination of the instant application, the claimed rejected under 35 U.S.C. 101 as non-statutory subject matter are further rejected as set forth below in anticipation of applicant amending the claims to place them within the four categories of invention.
